

Our customers & staff safety and care are our top priorities and both are on our mind as we all face the situation surrounding the coronavirus COVID-19.

I want to assure all our guests that we are redoubling our efforts to maintain the cleanliness of all of our boats, store locations and rental equipment: We disinfect all surfaces and equipment with disinfecting cleaning products all the time , have antiseptic gel at all locations, and we use a reef-safe cleaning biodegradable products to clean all of our boats each day, deck and engine / engine compartments. All our staff at the dive store will have face mask and shield mask, we will check everyone's temperature ,no exceptions !

We have removed all rinse buckets for masks and cameras from all our boats, no one other than staff can access cooler for drinks and fruit offer it on board and we leave two tank spots between divers. All divers and crew must wear facial covering , also our crew and dive masters will wear shield masks. For the rental equipment, we will NOT provide mouth pieces on the regulators, divers will have to bring their own or we will have them available for purchase. Snorkels the same procedure as well.

Divers can remove facial covering once seated and gearing up to enter water at which time the scuba mask and regulator must be worn, upon return from dive, divers must keep the mask and regulator on until seated and able to put facial covering back on. Our marine head will be disinfected after each use and after each charter, no gear rinse bucket.

We will supply a hose for gear rinse once we return to the hotel. Rental regulators are issued without mouthpieces. Divers must buy a new one which they keep after the dive trip or dive package they purchase, also snorkel equipment for rentals, the snorkel will be available for purchase (not reusable) .

Helm area is for captain and crew only until further notice.
